WORK HISTORY

Vendor Engineer at Adobe, Lehi, UT — January 2022—Present

Played a key role in the development of the Milo framework, currently used across the vast majority of adobe.com. Worked with a multitude of Adobe designers, builders, engineers, and others to produce blocks for Milo that could be used across the organization, with various teams building new web pages using the Milo framework. A significant number of the pages on adobe.com that ultimately produce sales for Adobe use this framework. Today, I take pride in knowing there is very little of adobe.com that does not contain at least some trace of my code.

Senior Frontend Developer at Thinkingbox, Salt Lake City, UT — February 2020—January 2022

Built award-winning web experiences that leveraged a wide variety of technologies, including Python, Elixir, Java, PHP, Javascript, and CSS. Mentored a team of Experiential Developers during the COVID-19 pandemic (when in-person experiential projects were no longer possible) on how to build web-based experiences. Gained a vast wealth of knowledge working in and developing for Adobe Experience Manager (Dexter). Built many different custom filters for Instagram and Snapchat using Spark AR and Lens Studio. Notable clients include Adobe, Verizon, Riot Games, and Workfront.

Frontend Developer at Welikesmall, Salt Lake City, UT — August 2015— February 2020

Helped build award-winning web experiences for a variety of clients, in many cases creating their main dot-com websites. The vast majority of projects I worked on during this time utilized either Django, Vue, or both. I also gained knowledge in deploying and managing sites using AWS and Google Cloud Platform. Notable clients include Starbucks, Adobe, Happy Egg, and Earls.

SKILLS

Languages: Javascript, CSS, SCSS, Typescript, Python, PHP, Elixir, Java, Rust, MySQL, PostgreSQL

Frameworks/Libraries: React, Preact, Vue, three.js, GSAP, Lottie, Wordpress, Django, Spark AR, Lens Studio
